Fullstack developer that is truly driven by creating interactive, user-centered digital experiences. I love blending beautiful design with a solid back-end structure, while always keeping state management in mind. Seeking a challenging role where I can deepen my knowledge, expand my skills, and learn new technologies while contributing to a team.

SKILLS

Frontend: JavaScript, TypeScript, React, Redux Toolkit, Next.js, Vite, Three.js, React Three Fiber, Recharts, Phaser

Backend: Node.js, Express, Python, Prisma, PostgreSQL, Mongoose, MongoDB, SQLite, Zod, Passport, Socket.io, Faker.js

Styling: Tailwind, DaisyUI, Framer Motion, Bootstrap, React Bits

AI: Claude Code, Prompt Engineering, RAG, Groq, Ollama, HuggingFace, MstyStudio

Testing: Vitest, Playwright, Jest, React Testing Library, axe-core

Auth & Platform: Clerk, NextAuth, Neon, Vercel, Vercel Blob, GitHub Actions

Version Control: Git, GitLab, GitHub

Workflow: Agile, Scrum, GitLab Issues

EXPERIENCE

Student Developer — Next Chapter Coding Bootcamp

APR 2026 – PRESENT

- Building production applications in an AI-driven fullstack bootcamp centered on modern, AI-assisted engineering workflows.
- Shipped Nuzzle (nuzzledogadoption.us) — dog-adoption compatibility platform with a deterministic 100-point matching engine, confidence scoring, and AI-written explanations. Next.js, TypeScript, Prisma, Neon PostgreSQL, Clerk, Groq; tested with Vitest and Playwright.
- Shipped Project Nova (project-nova.app) — workflow-driven case-management platform for grant-funded transitional employment, with four role-scoped experiences, 800+ tests, automated WCAG AA contrast gates, and CI quality gates with auto-merge.
- Co-built DreamNet on a two-person team — social dream journal with a star economy, Bayesian leaderboard, and a Three.js 3D world; built the full main app (NextAuth, Prisma 7, PostgreSQL) against an API contract agreed up front.
- Built AOG Necrology — AI-assisted transcription pipeline (Python + Claude Code agents) that turned 70 years of scanned USMA memorial reports into a searchable database and static Next.js site.

Teaching Assistant — Persevere

JUL 2025 – FEB 2026

- Supported a classroom of 20 students with debugging, pair programming, and technical questions.
- Built fullstack side projects: a todo & notes app with priority sorting and dynamic search, an AI chatbot interface inspired by MstyStudio, and a real-time Discord-style chat app with servers, channels, and messages.
- Created classroom wiki content (git and GitLab setup, curriculum references), configured student machines with local Ollama models, and helped organize code-a-thon teams.

Fullstack Developer — Persevere

JUL 2024 – JUL 2025

- Leash & Learn Dog Training — fullstack project tracker with login and sign-up, dynamic services, 8-week training sessions by class type, an AI chatbot that maintains per-user history, class enrollment, and CRUD for services, roles, trainers, users, dogs, classes, and blogs.
- Donor Database — collaborated with a small development team on a donor-tracking database proof of concept; created the application's Style Guide.
- Practiced team git workflow end-to-end: issue tickets, branches, merge requests, and manual conflict resolution.
- Prompt engineering for text and image generation — crafting and iterating precise prompts to eliminate artifacts and get the desired output.

EDUCATION

Persevere Full Stack Certification — ASPC Perryville — Goodyear, AZ

JUL 2025

A.A.S. Cyber Security — Cochise College — Sierra Vista, AZ

MAY 2014

Member of Phi Theta Kappa Honor Society

A.A.S. Network Technology — Cochise College — Sierra Vista, AZ

MAY 2012

Member of Phi Theta Kappa Honor Society
